

Migration and Health: International Policies, Programmes and Regional Experiences

Identification and collection of management solutions for improving migrants' access to health and social care designed and implemented by Regions

Collection Form

Contact Person

Name and surname: Jenny Malmsten, PhD International Migration and Ethnic Relations
Email: jenny.malmsten@skane.se
Name of the Institution or Organization: Center of Knowledge Migration and Health

<i>Required information</i>	<i>Brief description</i>	<i>Additional information</i>
Institution	<i>Provide the name of the institution or entity that created/designed the good practice;</i>	Skåne Regional Council/Region Skåne.
Region	<i>Localization in Europe or beyond;</i>	Region Skåne in southern Sweden.
Good practice (GP) description	<i>Provide a brief description highlighting: how the idea came to mind; what health or social problem does it contribute to solve; How this solution is more efficient than the previous;</i>	Center of Knowledge Migration and Health is financed by the Skåne Regional Council with the purpose of providing knowledge in multicultural issues to health care professionals (both public and private) and to develop good practice within the field of migration and health. There is a diverse population in Sweden as well as in Skåne and new methods must be developed in order to insure equal health to all people living in Skåne. Also, in a short period of time, many refugees have come to Sweden, and health care providers are faced with a new group of patients that need adequate care.
Involved actors	<i>Describe here who is involved in the GP implementation/management beyond the creators;</i>	Center of knowledge Migration and Health started February 1 st 2016 and is currently meeting different actors to collaborate with. It is co-located and working in close collaboration with Center of Knowledge Children's Health and Center of Knowledge Women's Health.

Date of establishment of the good practice	<i>Highlight here the date of establishment of the good practice, including a brief description of the process from ideation to implementation;</i>	Center of Knowledge Migration and Health started February 1 st 2016 and it is therefore too soon to provide insights regarding good practice.
Impact to present	<i>Describe the impact and benefits the GP has produced, up to present.</i>	See above.
Foreseen durability	<i>For how long has the GP been in use in your territory? For how long is it foreseen to have it in place? What are the implications for its sustainability?</i>	Since issues regarding migration is a permanent topic in Skåne and Sweden, it is at this point a permanent establishment within the Skåne Regional Council.
Potential for replicability	<i>Describe here the conditions and requirements for the GP replicability, with emphasis on methodological and budget implications;</i>	In Skåne Regional Council there are already several centres of knowledge within different fields. Thus Center of Knowledge Migration and Health is at this time replicating other centres of knowledge. Therefore the prospect of eventually replicating the Center of Knowledge Migration and Health is good.
